Women In Science (WIS) is a SFRRRI sub-committee whose focus is to improve pathways for women to contribute fully to academic research by promoting the visibility and participation of female scientists in SFRRRI and regional SFRR Societies.

SFRRRI WIS was established as a SFRRRI sub-committee in 2018 with strong support from the SFRRRI Executive Committee. At the SFRRRI Biennial Meeting (hosted by SFRR-Europe) in Lisbon, Portugal in 2018, SFRRRI WIS and SFRR-Europe WIS and Society for Redox Biology and Medicine WIS organized the first international WIS Forum, attended by more than 50 female and male scientists. At the SFRRRI WIS Forum in Lisbon, Lin Mantell, Marie-Carmen Gomez Cabrera and Maria Paola Nitti chaired a Round Table discussion with Chang Chen, Ting-Ting Huang, Elizabeth Ledgerwood and Patricia Oteiza. In 2021, WIS from all regional SFRR Societies were invited and agreed to join the SFRRRI WIS Forum.

The Women in Science (WIS) Forum of SFRRRI is an evolving and dynamic sub-committee that seeks to support and enhance the careers, scientific achievements and leadership roles of women in the field of redox biology and medicine.

Our objectives are to:

1. Expand the participation, visibility, and leadership roles of female scientists in all Society functions and activities
2. Invite female scientists to present their research at the Annual Conferences
3. Provide training workshops on essential career skills
4. Promote leadership development and opportunities for junior scientists
5. Encourage the use of collaborative models that maximize openness, inclusiveness, and mutual success.

Leadership and Development:

One of the goals of WIS is to develop strategies to promote women in leadership roles in the scientific community, both within SFRRRI as well as in their careers. We are exploring ways for women within SFRRRI to network with those who have obtained leadership roles as officers, editors and participating in plenary sessions at SFRRRI Biennial Meetings. We also promote and encourage the nomination of highly successful female scientists for distinguished awards given by the SFRRRI.

Website:

In addition to leadership development, WIS maintains the Women in Science (WIS) webpage on the SFRRRI website. The purpose of the webpage is to increase awareness of the WIS Forum and thereby increase participation of female scientists in the SFRRRI WIS Forum. Please contact Prof. Lin Mantell for further information and to share WIS event in your regional SFRR Societies.

Chair: Professor Lin Mantell (Email: mantell@stjohns.edu)

Giovanni E. Mann
